

# What a lot of learning!

We have learnt about measures through baking and making play dough. We can talk about objects that are longer and shorter. We have also been counting out from an amount and have been using language like more and less. We have also been noticing and commenting on shapes.

We have been learning how to construct using our imaginations and loose parts, focussing on how to join, balance and deciding which shapes work best.

We have been practising our mark-making using lots of different art medias.

We have continued to practise our fine motor skills with our 'Funky Fingers' activities. We have been doing lots of threading, using tweezers, pipettes and our favourites, Dough Disco and Flipper Flappers!

We have had lots of fun learning new songs and stories to help with our phonics. We are beginning to listen for the initial sound of a word and can blend the sounds in CVC words.

We have been developing our gross motor skills playing in the sandpit, building obstacle courses, climbing, sweeping, running and jumping.
