

TURQUOISE ROOM OUR LEARNING SUMMER 2 WEEK 3

Last week we concluded our 'In the Sea' theme. We learned about the big whales and sharks that live in the sea which the children have thoroughly enjoyed.

Outdoors we made an activity where the children fed the shark with the bean bags. This was such good fun and was great for throwing practise as well as hand-eye coordination. As always, we spent a lot of time outdoors, enjoying sand and water play and playing in the big playground with our siblings and friends in Preschool.

The children have done lots of creative activities including making shark hats and whale collages to name a few. We have been learning about size and we have revisited shapes as well. We talked about the shark having triangle teeth and a circle for his eye.

The children had lots of opportunities to practice their fine motor development. There has been threading opportunities, playdough play, lots of mark making both indoors and outdoors and the children enjoyed the giant peg boards again which are proving popular.

On our next newsletter it will be all about trains as the children love playing with the train track at the moment.

Have a lovely weekend everyone and we look forward to seeing you all next week for another busy week at nursery.
