

TURQUOISE ROOM OUR LEARNING SUMMER 1 WEEK 3

As we conclude our farm topic, we have turned our attention to the specific animals that live on a farm.

In our creative area we enjoy using feathers to make an amazing hen, we used gloopy glue and had lots of sticky fun, we also experimented using mud to paint with, we mixed mud with water and created a super consistency, we then used the muddy paint and our fingers to make a pig. We love to use a fork to create with paint, this week was no different, we used bright yellow paint and a fork to make a cute little chick. Well done everyone, great job.

This week we practiced our scissor skills, under full supervision we used some scissors to snip out different farm animals, we listened well to the instructions given and loved our farmyard scene.

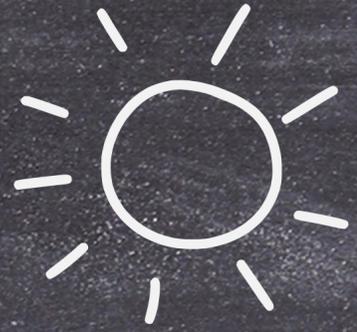

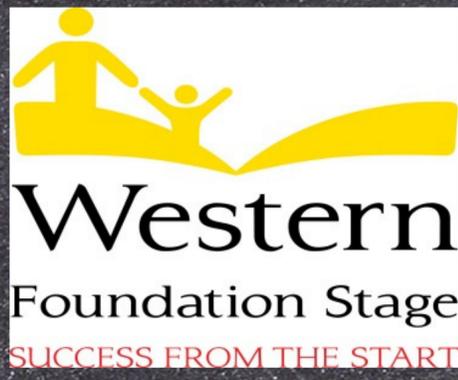

Using our fine motor skills, we enjoyed giving a sheep a woolly coat, we used tweezers to pick up a cotton wool ball and placed it on a sheep outline, we counted the balls as we placed them down.

As the weather continues to be glorious, we take our learning and play outside, we love to play in sand and water, we added some flowers to our water play and created some sweet-smelling perfume, definitely a favourite activity of my childhood.

Our chat times continue to be filled with wonderful stories, songs, rhyme's and music.

Well done on another super week.
