

## YEAR TWO~ OUR LEARNING SUMMER 2 WEEK 4

In science in year 2, we have been thinking about where food comes from. The children discussed where they might get their food from and what journey it had been on to reach our homes. We looked at foods which came directly from the farm and those which needed to go to a factory to be processed. The children asked some fantastic questions and we researched the journey our favourite needed to go on. We then used sketches or keynote to represent the journey.

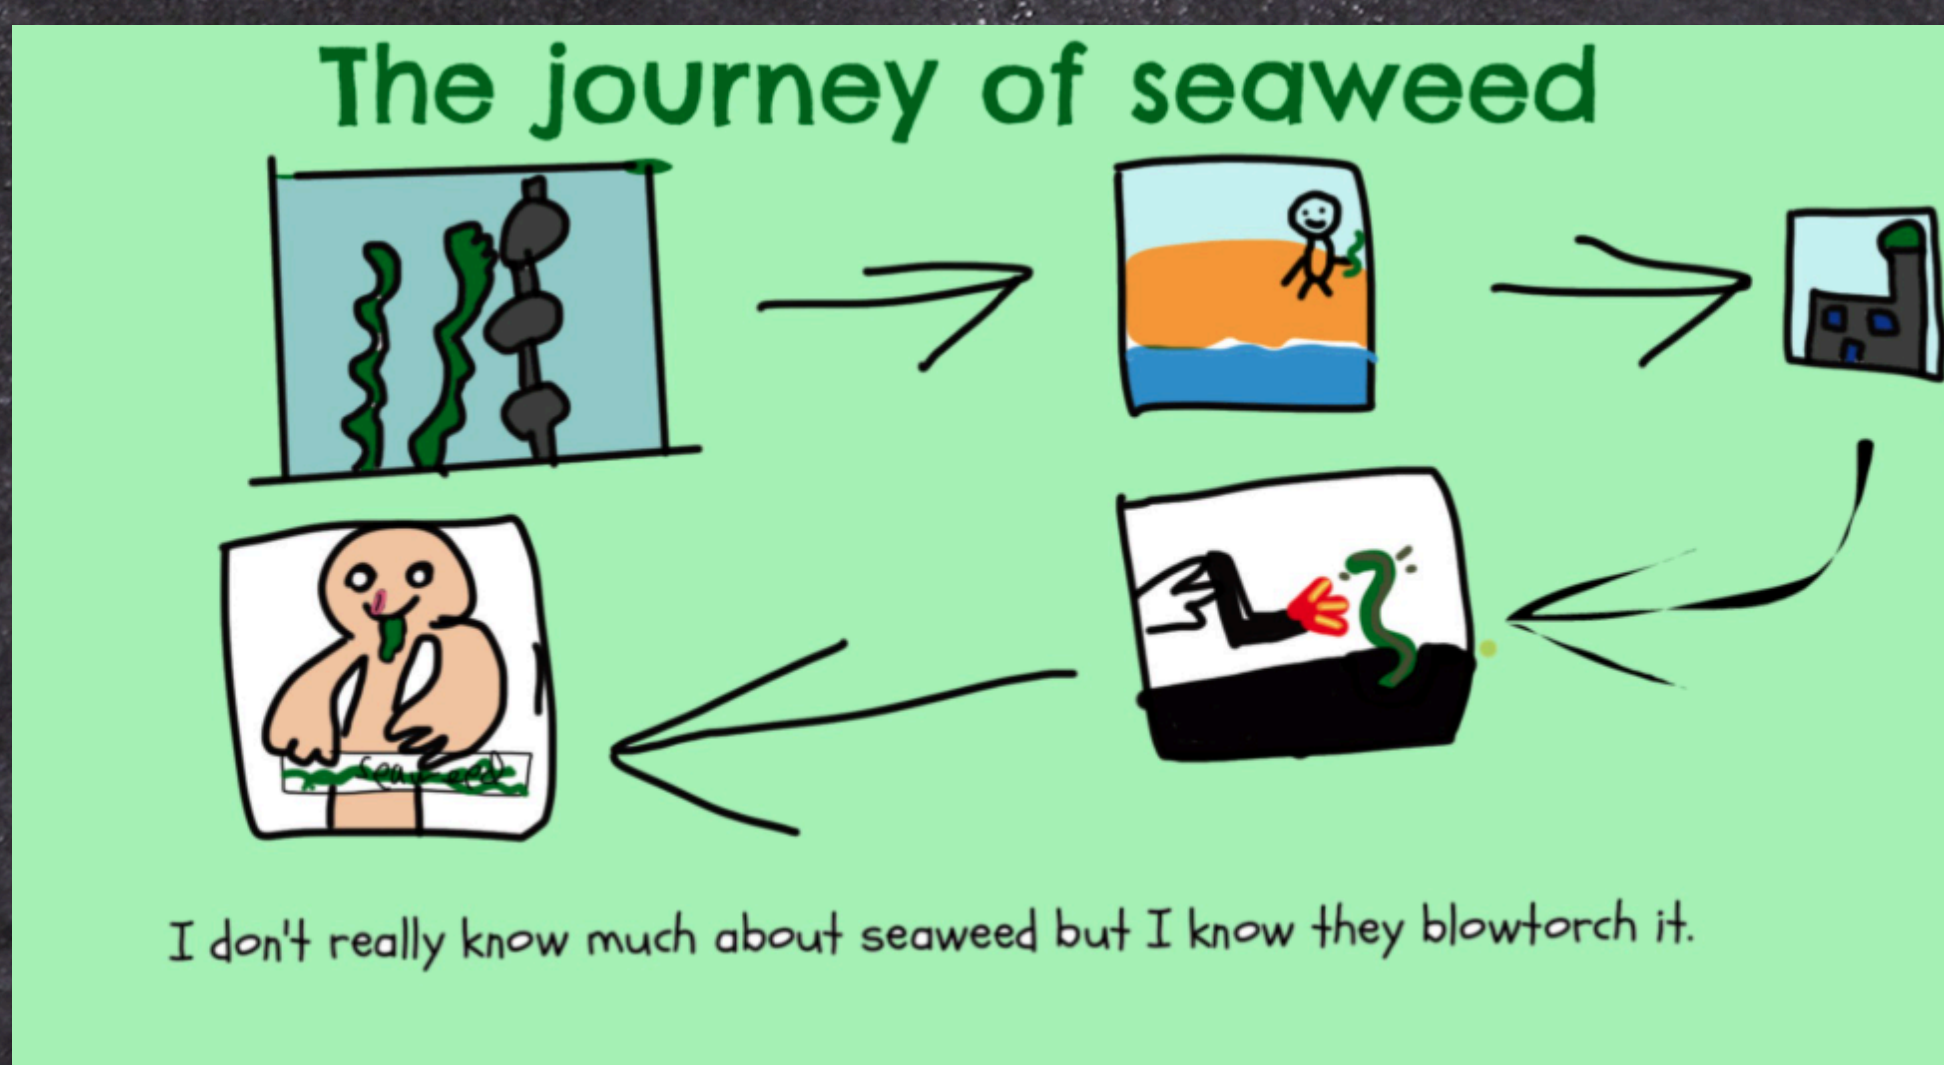

Our computing lesson was the start of a new topic about digital music. We listened to some of The Planets by Holtz and thought about which was our favourite piece of music and how it made us feel. The children explored the sounds of the different instruments on the apps garage band and chrome music lab. We had lots of fun discovering the different sounds which could be made and are looking forward to creating our own rhythms and patterns.

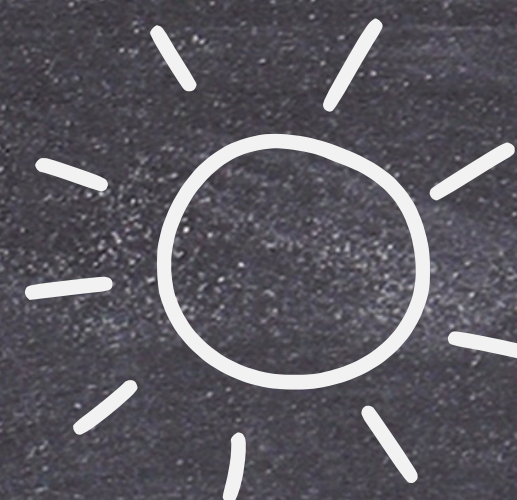

In Religion and World views we found out how important the lotus flower is in the Hindu religion. The lotus turns into a beautiful flower and represents how people should be kind and good. The children showed their creative skills by creating their own lotus flowers. They were fantastic and look beautiful altogether.
