

YEAR TWO~ OUR LEARNING SUMMER 2 WEEK 4

In maths this week we have thinking about giving precise instructions to describe position and direction. We recapped our understanding of left and right and thought about how we could check if we were unsure. The children thought about the clear instructions to describe moving from a starting position to a different location. This linked with some previous work we had covered in computing. We were impressed with hook the children applied this knowledge to different tasks.

We have been preparing for our KS1 show this week. Our headbands are completed and look amazing. The children have done a great job learning the songs and sound fantastic. We now know where we are sitting on the stage and are practising our words. We can't wait to share our show with everyone.
