

YEAR 3/4~ OUR LEARNING SUMMER 1 WEEK 1

PE

This week, we have started playing hockey!

Geography

In geography, we have launched a new subject called 'Planet Protectors', which will focus on ways we can look after our planet. This week, we learnt about some of the different challenges our planet faces and small but achievable things we can do to help protect it. The children identified 5 things which they felt able to do and then as a class we made a promise of what small acts we could commit to within our school community.

English

In English, we are preparing to write persuasive leaflets themed to our geography lessons. This week, we have been looking at key features of persuasive texts and spotting them in leaflets. As well as this, we have been doing some dual coding and learning the meaning and spellings of some new vocabulary.

PSHE

In PSHE, we have started a new unit called 'Economic Well-being' and this week we looked at spending choices and what might influence us, including our ethics, our needs and wants.

YEAR 3/4~ OUR LEARNING SUMMER 1 WEEK 1

biodiversity

The variety of all the living things on Earth.

Five Ways I Can Help Care for the Earth

Turn your lights off

Turn the tap off

Pick up litter

Bring a reusable bag to the shop

Don't flush your number one's

OUR PLANET PROTECTOR PROMISE

- We will not drop litter and pick-up other peoples
- Turn off the lights!
- Turn off the board.
- Recycle effectively
- Let's make everyday Earth day!

environment

Everything that surrounds us, including living things and non living things.
