

YEAR ONE~ OUR LEARNING SUMMER 2 WEEK 2

Last week in Year 1 was full of fun and learning. In art, the children had a great time experimenting with materials from around the classroom to make their own mono prints. In science, we explored the structure of reptiles and discovered how they're different from amphibians. Maybe your child can tell you all about reptiles! In English, we used the Pages app to publish our Handa's surprise re-tells, and the children were so proud of their work. In PSHE, we talked about how people keep their money safe and shared ideas about how we can do the same when we are out and about.

One **sunny** day, handa decided to take some **fruit** to her best friend akeyo.
she put the fruit into a basket and popped it onto her head.
First the cheeky *monkey* pinched the soft, **yellow** banana.

Scenario 1

Metacognitive
Thinking

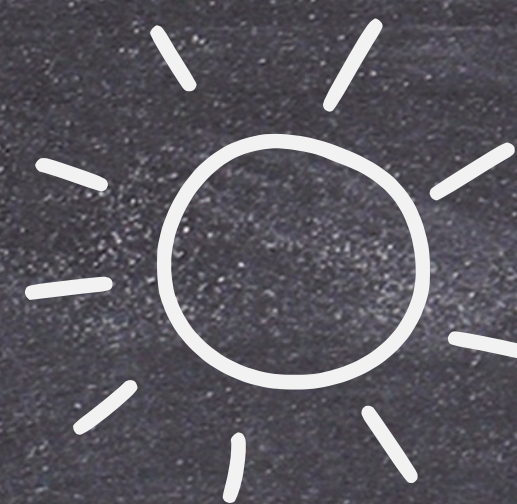

Billy has been given some pocket money by his dad. Billy has a lot of cash now. There is one note and five coins.

Where could Billy put his money to keep it safe?

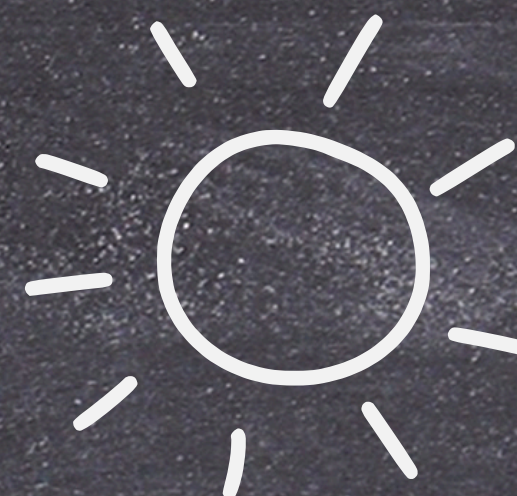

Draw or write your answer in box 1.
