

YEAR ONE~ OUR LEARNING SPRING 1 WEEK 1

Despite the chilly start, the children have returned to school ready and raring to get started with this term's learning! They have thoroughly enjoyed diving into our new core text, *Field Trip to the Moon*. The children have made predictions about the story, sequenced events, and written sentences about key parts, showcasing their creativity and comprehension skills. In maths, we've been exploring numbers to 20, with lots of fun subitising and discovering more about the number 10. We even had a lively dance with Numicon tiles, finding partners to make 10!

In DT, we examined rockets and their structures before sketching our own designs. The children loved learning about how rockets work.

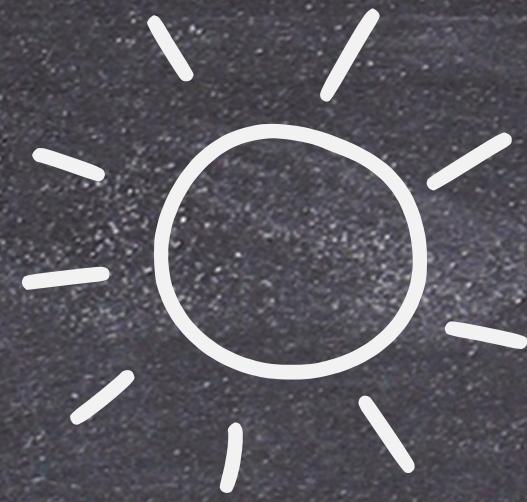

In Computing, we explored the Pages app, starting our presentations on Tim Peake. We're excited to add to our presentations each week, whilst developing the skills needed to make our presentations engaging.
